

Applications of Synchrotron-based X-ray Absorption Spectroscopy and Infrared Microscopy to Investigate on Advanced Functional Materials

Dr. Pinit Kidkhunthod

*Synchrotron Light Research Institute (Public Organization),
Nakhon Ratchasima, 30000, Thailand
e-mail: pinit@slri.or.th*

Dr. Pinit Kidkhunthod is a beamline manager at the SUT-NANOTEC-SLRI XAS beamline (BL5.2), Synchrotron Light Research Institute (Public Organization), Nakhon Ratchasima, Thailand. His research of interest is in the fields of structural studies of advanced functional materials such as carbon-based ferrite composite materials and novel glasses using an X-ray absorption spectroscopy (XAS) technique. Dr.Pinit Kidkhunthod received his BSc. (Physics), first class honors 3.99 from Khon Kaen University, Thailand in 2008, and Ph.D. (Physics) from Bristol University, U.K in 2012. He was one of two Thai students representative for DESY summer program, Germany, in 2007. Recently, Dr.Kidkhunthod has received research grants for young scientist from Thailand Research Fund (TRF), Ministry of Science and Technology and center of excellent on advanced functional materials from Suranaree University of Technology (CoE-AFM). He is the author of over 80 papers in ISI journals for structural studies of advanced functional materials using combined-XAS and other synchrotron-based techniques.
