

Dr. Prayoon Songsiriritthigul received B.Sc. from Chiang Mai University in 1990, and continued his Ph.D. study at the Department of Physics of Gothenburg University. His Ph.D. focused on the applications of ion accelerators for material modifications and analyses. He received the Ph.D. degree in 1997, and returned to Thailand to participated in the development of a Thai synchrotron light research facility, known as the “Siam Photon Project”. He joined the team to design and construct the accelerator complex. After the installation of the light source, he led a team to design and construct a synchrotron light beamline for photoemission spectroscopy, and later a beamline for X-ray absorption spectroscopy. His current interests are the development of synchrotron instrumentation and applications of synchrotron light techniques. His research reports may be found at <https://scholar.google.com/citations?user=uKpL4kYAAAAJ&hl=en> or https://www.researchgate.net/profile/Prayoon_Songsiriritthigul.
