

SLM Solutions is one of the key suppliers in Metal Additive Manufacturing (AM) equipment in the global market. SLM Solutions believe the adoption of AM in various industrial sectors would have great outcome for the years to come. Therefore, SLM Solutions is partnering with innovative companies such as Divergent 3D that could change the way cars are manufactured.

In the presentation, an overview of the powder bed fusion technologies applied in SLM® series machines will be introduced. Application case studies from various industrial sector will also be introduced.

Due to the market growth and customer demands, SLM Solutions' strategy in transferring from machine manufacturer to the solution provider will be explained.

Last but not least, the active R&D within and collaborated with research institutes will also be introduced.
