### **Corrosion under Insulation (CUI) - The Simple Approach**

**Anton Hajj**

*Jotun AS, Norway*

Corrosion under insulation (CUI) is undoubtedly a very complex subject, however, developments in the coating industry now present asset owners with a variety of reliable and simplified solutions.

The presenter will firstly discuss the general causes of CUI and then present the newest coating technologies (including, Titanium catalyzed Inorganic Ceramic copolymer, Glass Flake Epoxy Composite, and Zinc for High-temperature operation), all of which can simplify the owner's or contractor's battle against CUI.
