

Biography

Siam Dowmanee holds a Bachelor Degree of Mechanical Engineering, Chulalongkorn University and a Master Degree of Business Administration, Burapha University, Thailand.

He has previously worked for 32 years in the zinc producing and smelter industry, Padaeng Industry PCL as the last positions of the Corporate Vice President- Process and Technology-Innovation, and the Executive Vice President-Rayong Operation. He currently serves as a Consultant to the Thai Galvanizing Association (TGA) for developing a greater Thailand awareness of the role and importance of zinc coatings for steel corrosion protection. The key aspect of his role is to promote a better understanding for engineers, architects, project consultants and specifiers who engaged in Hot-dip Galvanizing applications to structural steel construction around the infrastructural development projects. In this regard he has conducted many educational seminars concerning to zinc coatings for government authorities, private sector organizations and leading academic institutions.
