

Dr. Jiunn-shyong (Rolly) Luo is the senior engineer of Dept. of Advanced Electrochemistry & Corrosion Prevention, Material and Chemical Research Lab., Industrial Technology Research Institute (ITRI), Taiwan, where he has been since 1998.

He obtained his M.S/ Ph.D. degrees from Florida Atlantic University, USA in 1987/ 1991, majored in cathodic protection of marine materials at the Dept. of Ocean Engineering. Presently, his research and projects focus on Cathodic Protection, Stray Current Corrosion and Control of Rapid Transit systems, Atmospheric Corrosion, Marine Corrosion, Rebar Corrosion, and Microbiologically Influenced Corrosion.

Dr. Rolly is a NACE International certified cathodic protection specialist and CP1 & CP2 course instructor. He is currently an AHD45 Corrosion Committee member of Transportation Research Board (TRB)/ National Research Council (NRC), USA. He is also a vice chairman of NACE International Taipei Section in 2017.
